Uniplex V8.10 Demonstration System

SAMPLES

Files in this folder are copied to the temporary demo folder in the users home directory. Files can be added to this list freely and will automatically be copied.

All files here should be read/write all. They will be transferred as read/write all.

```
SAMPLES                              Samples directory
SAMPLES/UAP                          Sample HOME UAP files
SAMPLES/UAP/umail/umail.fn           Special mail softkey file
SAMPLES/UAP/umail                    Folder
SAMPLES/UAP/uniplex.menu             Special demo menu
SAMPLES/UAP/uniplex.sys              Uniplex.sys for diary build
SAMPLES/UAP/diary                    Diary directory
SAMPLES/UAP/diary/diary.holiday      Empty holidays file for diary
SAMPLES/agenda                       Agenda document
SAMPLES/agenda.doc                   Ditto word format
SAMPLES/agenda.txt                   Ditto text format
SAMPLES/bground.wp                   Background sample
SAMPLES/budgets                      Budgets folder
SAMPLES/budgets/prices.ss            Sample spreadsheet
SAMPLES/budgets/staff.ss             Sample spreadsheet
SAMPLES/correspond                   Dummy folder

SAMPLES/misc/plan.wp                 Dummy file
SAMPLES/misc/scraps.wp               Dummy file
SAMPLES/misc/vacation.wp             Dummy file
SAMPLES/oldproject1                  Dummy file
SAMPLES/oldproject2                  Dummy file
SAMPLES/oldproject3                  Dummy file
SAMPLES/oldproject4                  Dummy file
SAMPLES/proposal.wp                  Demo document
SAMPLES/rep1                         Report output file
SAMPLES/research                     Research WP document
SAMPLES/research.doc                 Ditto Word
SAMPLES/research.txt                 Ditto Text
SAMPLES/std.ltr                      Standard Letter for mailmerge
SAMPLES/table.wp                     Table sample
SAMPLES/template                     Report Writer Template
SAMPLES/template2                    Report Writer Template
```

There is also a file in the main UAP/outlines/wp folder
called udemo.contract which is used as a named template
("UDEMO: Contract outline").

Uniplex V8.10 Demonstration System

UAP Folder

Files here are used whole, or as templates for building central UAP files. The "dates" files are used to control the building of new diaries. The "mail" files are copied whole. "File.index" is used to control the building of the File Manager index.

```
UAP                                    Special /usr/UAP files
UAP/date.DemoSuite                     Dates for DemoSuite diary
UAP/date.DemoUser                      Dates for diary
UAP/date.Managers                      Dates for Managers diary
UAP/file.index                         Data for ufmscan
UAP/umail                              Mail folder
UAP/umail/../mbox7                     Implementation mailbox
UAP/umail/../mbox7/D/00002.00000003
UAP/umail/../mbox7/D/00005.00000009
UAP/umail/../mbox7/D/0000b.00000010
UAP/umail/../mbox7/DETAILS
UAP/umail/../mbox7/D
UAP/umail/../mbox7/I/00006.0000000b
UAP/umail/../mbox7/I/00009.0000000e
UAP/umail/../mbox7/I/0000a.0000000f
UAP/umail/../mbox7/I
UAP/umail/../mbox8                     Workflow mailbox
UAP/umail/../mbox8/DETAILS
UAP/umail/../mbox8/I/00008.0000000d
UAP/umail/../mbox8/I
UAP/umail/../mbox9                     Internet mailbox
UAP/umail/../mbox9/DETAILS
UAP/umail/../mbox9/I/00007.0000000c
UAP/umail/../mbox9/I

UAP/umail/text/demo
file.list                             This file.
udemo                                 Control shell script
```

Uniplex V8.10 Demonstration System

RUNNING DEMONSTRATIONS

To run a demonstration use the command script 'udemo', the full path
is $Uredirect/UAP/demo/udemo/udemo. This script can be copied to a
more convenient location such as /usr/bin or UAP/cmds if required,
however a copy of the script must remain in the udemo directory.

The control script udemo can be run as follows:

udemo   Perform, clean, build, run, clean sequence.
                Prepares and runs a complete demonstration sequence.

udemo build   Prepare the demo files, but do not run the demo.

udemo run   Run the demonstration, will build files if not
                present.

udemo clean   Clean up demo files. If run after partial installs or
                cleans it will clean up remaining portions.

udemo -V   Report udemo version number.

Multiple users may run the demo at the same time. A single user
cannot run two demos at the same time.

CHANGING/ADDING FILES

Files can be freely added to the SAMPLES folder as all files here are
automatically copied to the target folder. File entries must be added
to the control file "UAP/file.index" if the files need to be indexed
into the File Manager.

All files within the directory are copied and given read/write all.
All folders are copied and given read/write/execute all.

UAP/file.index

The format of this file is:

        Filename, Title, Relative Path, Document Type

for example:

        budgets,Budgets,,FOLDR
        agenda.doc,Agenda for Meeting - WORD,,1620
        agenda.txt,Agenda for Meeting - Text,,1167
        bground.wp,Back grounder,,WPDOC
        staff.ss,Budgets,budgets,SSUSE
        prices.ss,Prices,budgets,SSUSE

The relative path is given relative to SAMPLES, so most files do not
require a path to be specified.
