

onValid

The implementation of an effective quality management system according to DIN EN ISO 9000: 2000, VDA 6.1 or QA 9000 offers your company the opportunity to actively meet the requirements of the market.

onValid is the modular solution for the creation of QA documents. Featuring transparency, traceability and saving time in the fulfilment of standards. The solution also includes document management and revision controlled archiving. It is usable "stand alone" or in combination with standard QA systems.

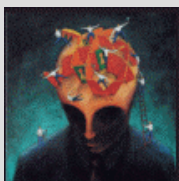

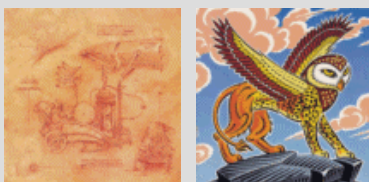

onValid can help in the following areas

- Procedure and operation instructions
- Web or LAN based administration of QA documents
- Project documentation
- Cross-application compound documents
- Generation of report, predefined standard analysis
- Activity management for structured and unstructured document management (workflow), certifications, auditing, protocol function, standard routes/electronic signature, follow-up
- Creation of technical manuals
- Information administration
- Connection to ERP, CRM, Office, CAD and Groupware systems
- Revision controlled long-term archiving

Benefits

With onValid your company will be able to meet quality requirements such as VDA, TS-16949, ISO, and others. The modular structure enables step by step gradual integration.

- Structured and transparent creation of QA documents
- Time and resource saving
- Schedule adherence and security
- Simplified auditing and certification

onValid
